

TS7 7" In-Wall Touch Screen

- Easy control and navigation of entertainment and home systems
- Video for TV, DVD or camera viewing
- Convenient hard buttons for one-touch control of lighting, volume and media zone on/off
- High-resolution 7-inch widescreen Active Matrix LCD means precision control

Next Generation of Control

The hip **g!** interface marries its fun array of control icons to Silicon Valley's latest digital touch technologies for ELAN's powerful next generation touchscreen, the TS7. This elegant user interface means effortless Whole House Management and Entertainment is only a finger-swipe away for everyone in the family. The TS7's touch and flick design is a remarkably easy way to navigate and control even the most sophisticated systems. And the touchscreen's intuitive icons are uniform across all ELAN system controllers so there is never a learning curve – for even the youngest users!

Performance Champ

The hardware driving the TS7 delivers great looking graphics and video as well as top performance for years of enjoyment. The seven-inch, high-resolution 16:9 display uses the same screen technology as many popular PC tablets, with a resolution of 800 x 480 pixels. There is also composite video capability for viewing live TV sources or security cameras. The screen surface allows for finger-tap control although there is also a handy stylus for internet navigation. Also included are six backlit hard buttons for instant control of zone on/off, volume, mute and lighting.

The Kitchen Sink and More

The TS7's lightning fast response allows effortless access and control of installed Audio, Theater, Security, Climate, Messaging, Lighting, Video, DVR, Irrigation and Pool and Spa subsystems. In addition, the built-in speaker and microphone make family messaging a breeze. But the feature that will put a smile on everyone's lips is the screen saver's photo mode. Load your digital photo collection onto the system controller and the TS7 will dazzle all with unexpected slide shows of cherished pictures between uses. Tie it all together with one of five designer frames and the TS7 offers a picture perfect control solution!

TS7 7" In-Wall Touch Screen
